PRIMARY
Saint Jude Montessori
Educational Center
2007 - 2013

SKILLS

- HTML
- CSS
- Web Builders
- SEO
- Arduino

LANGUAGE

English

Filipino

ABOUT ME

As a recent computer engineering graduate from Lorma Colleges, I possess a strong foundation in both hardware and software, coupled with proficiency in HTML, CSS, MySQL, and web development platforms like WordPress, Weebly, and Snapps. Additionally, my knowledge of Search Engine Optimization helps improve website visibility on search engines. During my online internship at Creotec Laguna, I gained hands-on experience with Unity 3D for mobile applications, and in our design project we utilize Arduino for innovative tech solutions. With a drive to excel and adapt to diverse environments, I'm eager to contribute my skills and continue growing as a versatile professional in the field.

WORK EXPERIENCE

2022 - OJT
Creotec Philippines Incorporated | 117 Technology Ave, Laguna Technopark, Biñan, Laguna

Developer

One of the two assigned developers in our team who created the Tokai Seat Motor Final Inspection Instruction (TSMFII) mobile application using Unity 3D for Creotec Company. This app aims to eliminate the use of traditional papers upon doing inspection. The TSMFII is a mobile app that is ready for viewing the different instructions needed for the Tokai seat motor.
